## LICENSE INFORMATION

The Programs listed below are licensed under the following License Information terms and conditions in addition to the Program license terms previously agreed to by Client and IBM. If Client does not have previously agreed to license terms in effect for the Program, the International Program License Agreement (i125-3301-15) applies.

Program Name (Program Number):

IBM Data Replication V11.4.0.5 (5737-C30)

IBM Data Replication for Non-Production Environments V11.4.0.5 (5737-C30)

The following standard terms apply to Licensee's use of the Program.

### Supporting Programs

Licensee is authorized to install and use the Supporting Programs identified below only to support Licensee's use of the Principal Program under this Agreement. The phrase "to support Licensee's use" would only include those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. A Supporting Program may be accompanied by license terms, and those terms, if any, apply to Licensee's use of that Supporting Program. In the event of conflict, the terms in this License Information document supersede the Supporting Program's terms. Licensee must obtain sufficient entitlements to the Program, as a whole, to cover Licensee's installation and use of all of the Supporting Programs, unless separate entitlements are provided within this License Information document. For example, if this Program were licensed on a VPC (Virtual Processor Core) basis and Licensee were to install the Principal Program or a Supporting Program on a 10 VPC machine and another Supporting Program on a second 10 VPC machine, Licensee would be required to obtain 20 VPC entitlements to the Program.

Supporting Programs:

IBM Data Server Client

IBM Db2 Standard Edition

IBM MQ

### Prohibited Components

Licensee is not authorized to use any of the following components or functions of the Program:

IBM Data Replication Db2 for z/OS Remote Source

IBM Data Replication IMS for z/OS Remote Source

IBM Data Replication VSAM for z/OS Remote Source

MQ Advanced Message Security (of IBM MQ)  
MQ Managed File Transfer Service (of IBM MQ)  
MQ Managed File Transfer Agent (of IBM MQ)  
MQ Replicated Data Queue Manager (of IBM MQ)  
MQ Telemetry Server (of IBM MQ)  
MQ Native High Availability (of IBM MQ)  
MQ Native High Availability Cross Region Replication (of IBM MQ)  
MQ Operator (of IBM MQ)  
MQ Advanced Container (pre-built) (of IBM MQ)

## Non-Production Limitation

If the Program is designated as "Non-Production", Licensee can only use the Program as part of Licensee's internal development and test environment for internal non-production activities.

## Components Not Used for Establishing Required Entitlements

Licensee may install and use the following Program components, under the license terms, but these components are not used to determine the number of entitlements required for the Program.

IBM Data Server Client  
IBM Db2 Standard Edition  
IBM InfoSphere Data Replication Access Server  
IBM InfoSphere Data Replication Management Console  
IBM MQ  
Target data resources managed or processed by the Program

## Modifiable Third Party Code

To the extent, if any, in the NOTICES file IBM identifies third party code as "Modifiable Third Party Code," IBM authorizes Licensee to 1) modify the Modifiable Third Party Code and 2) reverse engineer the Program modules that directly interface with the Modifiable Third Party Code provided that it is only for the purpose of debugging Licensee's modifications to such third party code. IBM's service and support obligations, if any, apply only to the unmodified Program.

## Separately Licensed Code

Each of the components listed in the NON\_IBM\_LICENSE file is considered "Separately Licensed Code" licensed to Licensee under the terms of the applicable third party license agreement(s) set forth in the NON\_IBM\_LICENSE file(s) that accompanies the Program, and not this Agreement. Future Program updates or fixes may contain additional Separately Licensed Code. Such additional Separately Licensed Code and related licenses are listed in the applicable NON\_IBM\_LICENSE file that accompanies the Program update or fix.

Note: Notwithstanding any of the terms in the third party license agreement, the Agreement, or any other agreement Licensee may have with IBM, with respect to the

Separately Licensed Code:

(a) IBM provides it to Licensee WITHOUT WARRANTIES OF ANY KIND AND DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE, AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE;

(b) IBM is not liable for any direct, indirect, incidental, special, exemplary, punitive or consequential damages including, but not limited to, lost data, lost savings, and lost profits.

The following units of measure may apply to Licensee's use of the Program.

Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the Program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the Processor Value Unit (PVU) licensing for Distributed Software website at [https://www.ibm.com/software/passportadvantage/pvu\\_licensing\\_for\\_customers.html](https://www.ibm.com/software/passportadvantage/pvu_licensing_for_customers.html)) and the number of processors made available to the Program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the Program (if supported) using full capacity licensing, sub-capacity licensing (<https://www.ibm.com/software/passportadvantage/subcaplicensing.html>), or container licensing (<https://www.ibm.com/software/passportadvantage/containerlicenses.html>). See the linked websites for more information.

Instead of the entitlements required for the Program directly, Licensee must obtain PVU entitlements for this Program sufficient to cover the processor cores for the systems on which the resources managed or processed by the Program reside.
