

## IBM Cognos Analytics Modernization for Non-Production Environment 12.0

Published date : November 29, 2023

Online version : <https://www.ibm.com/terms/?id=L-GNAN-K8MR2V&lc=en>

### LICENSE INFORMATION

The Programs listed below are licensed under the following License Information terms and conditions in addition to the Program license terms previously agreed to by Client and IBM. If Client does not have previously agreed to license terms in effect for the Program, the International Program License Agreement (i125-3301-15) applies.

Program Name (Program Number):

IBM Cognos Analytics Modernization for Non-Production Environment 12.0 (5900-ABM)

The following standard terms apply to Licensee's use of the Program.

#### Bundled Programs

Licensee is authorized to install and use the Bundled Programs identified below. A Bundled Program may be accompanied by license terms, and those terms, if any, apply to Licensee's use of that Bundled Program. In the event of conflict, the terms in this License Information document supersede the Bundled Program's terms. The Principal Program and any Bundled Programs are all part of the Program, as a whole. Therefore, Licensee must obtain sufficient entitlements to the Program, as a whole, to cover Licensee's installation and use of all of the Bundled Programs, unless separate entitlements are provided within this License Information document. For example, if this Program were licensed on a VPC (Virtual Processor Core) basis and Licensee were to install the Principal Program or a Bundled Program on a 10 VPC machine and another Bundled Program on a second 10 VPC machine, Licensee would be required to obtain 20 VPC entitlements to the Program.

Bundled Programs:

- IBM Cloud Pak for Data Enterprise Edition
- IBM Cognos Analytics Cartridge for IBM Cloud Pak for Data for Non-Production Environment

#### Supporting Programs

Licensee is authorized to install and use the Supporting Programs identified below only to support Licensee's use of the Principal Program under this Agreement. The phrase "to support Licensee's use" would only include those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. A Supporting Program may be accompanied by license terms, and those terms, if any, apply to Licensee's use of that Supporting Program. In the event of conflict, the terms in this License Information document supersede the Supporting Program's terms. Licensee must obtain sufficient entitlements to the Program, as a whole, to cover Licensee's installation and use of all of the

Supporting Programs, unless separate entitlements are provided within this License Information document. For example, if this Program were licensed on a VPC (Virtual Processor Core) basis and Licensee were to install the Principal Program or a Supporting Program on a 10 VPC machine and another Supporting Program on a second 10 VPC machine, Licensee would be required to obtain 20 VPC entitlements to the Program.

#### Supporting Programs:

- IBM Cognos Dashboards
- IBM Cognos Transformer
- IBM Cognos Cube Designer
- IBM Cognos Dynamic Query Analyzer
- IBM Cognos for Microsoft Office
- IBM Cognos Framework Manager
- IBM Cognos Lifecycle Manager
- IBM Cognos Analytics for Jupyter Notebook
- IBM Planning Analytics for Microsoft Excel
- IBM Informix Server
- IBM WebSphere Application Server Liberty Core V9.0
- IBM Tivoli Directory Integrator Identity Manager
- IBM HTTP Server for WebSphere Application Server V9

#### Non-Production Limitation

If the Program is designated as "Non-Production", Licensee can only use the Program as part of Licensee's internal development and test environment for internal non-production activities.

#### Components Not Used for Establishing Required Entitlements

Licensee may install and use the following Program components, under the license terms, but these components are not used to determine the number of entitlements required for the Program.

- Content Manager
- Gateway

#### Source Components and Sample Materials

The Program includes components in source code form ("Source Components"), or other materials identified as Sample Materials or both. Licensee may copy and modify Source Components and Sample Materials for internal use only within the limits of the license rights under this Agreement; provided, however, that Licensee may not alter or delete any copyright information or notices contained in the Source Components or Sample Materials. IBM provides the Source Components and Sample Materials without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The following units of measure may apply to Licensee's use of the Program.

### Processor Value Unit (PVU)

Processor Value Unit (PVU) is a unit of measure by which the Program can be licensed. The number of PVU entitlements required is based on the processor technology (defined within the Processor Value Unit (PVU) licensing for Distributed Software website at [https://www.ibm.com/software/passportadvantage/pvu\\_licensing\\_for\\_customers.html](https://www.ibm.com/software/passportadvantage/pvu_licensing_for_customers.html)) and the number of processors made available to the Program. IBM continues to define a processor, for the purpose of PVU-based licensing, to be each processor core on a chip. A dual-core processor chip, for example, has two processor cores.

Licensee can deploy the Program (if supported) using full capacity licensing, sub-capacity licensing (<https://www.ibm.com/software/passportadvantage/subcaplicensing.html>), or container licensing (<https://www.ibm.com/software/passportadvantage/containerlicenses.html>). See the linked websites for more information.

### Virtual Processor Core

Virtual Processor Core is a unit of measure by which the Program can be licensed. A Physical Server is a physical computer that is comprised of processing units, memory, and input/output capabilities and that executes requested procedures, commands, or applications for one or more users or client devices. Where racks, blade enclosures, or other similar equipment is being employed, each separable physical device (for example, a blade or a rack-mounted device) that has the required components is considered itself a separate Physical Server. A Virtual Server is either a virtual computer created by partitioning the resources available to a Physical Server or an unpartitioned Physical Server. A Processor Core is a functional unit within a computing device that interprets and executes instructions. A Processor Core consists of at least one instruction control unit and one or more arithmetic or logic units. A Virtual Processor Core is a Processor Core in an unpartitioned Physical Server, or a virtual core assigned to a Virtual Server. Licensee must obtain entitlements for each Virtual Processor Core made available to the Program.

Licensee can deploy the Program (if supported) using full capacity licensing, sub-capacity licensing (<https://www.ibm.com/software/passportadvantage/subcaplicensing.html>), or container licensing (<https://www.ibm.com/software/passportadvantage/containerlicenses.html>). See the linked websites for more information.

In addition to the above, the following terms apply to Licensee's use of the Program.

#### 1. Prerequisite Programs

In addition to the entitlements required for the Program, Licensee must also obtain at least one entitlement to IBM Cognos Analytics Administrator Modernization.

#### 2. Bursting Feature Requirement

Licensee using the Bursting feature must ensure that they have sufficient capacity

entitlements to send the burst output to all recipients.

### 3. Program Details:

Licensee's entitlement(s) to the Bundled Program can be utilized according to one (1) of the following entitlement options:

#### Option 1:

IBM Cognos Analytics Cartridge for IBM Cloud Pak for Data for Non-Production Environment

- Conversion Entitlement Ratio: 1 VPC/ 1 VPC

IBM Cloud Pak For Data Enterprise Edition

- Additional Entitlement Ratio: 1 VPC/ 1 VPC

#### Option 2:

IBM Cloud Pak for Data Enterprise Edition

- Conversion Entitlement Ratio: 3 VPC/ 1 VPC

Under this Option 2, Licensee is prohibited from using IBM Cognos Analytics Cartridge for IBM Cloud Pak for Data for Non-Production Environment.

### 4. Red Hat Products

Red Hat Products are licensed separately and are supported by IBM only when used in support of the Program and only while Licensee has Software Subscription and Support in effect for the Program. The below entitlement restrictions apply solely to any Software Subscription and Support in effect for the Program and do not restrict Licensee's use of the Red Hat Products, which are licensed separately. Licensee agrees that its use of and support for the Red Hat Products are subject to the following terms (<https://www.redhat.com/en/about/agreements>), with the exception of the IBM backup policy and temporary use policy as referenced in the International Program License Agreement, which govern backups and temporary use for Red Hat Products included in the Program.

Red Hat Products listed below include software, maintenance and support in the form of Red Hat Software Subscriptions governed by a separate Red Hat Enterprise Agreement set forth at <https://www.redhat.com/en/about/agreements> (or if applicable, a negotiated version of such agreement between Licensee and Red Hat). Under this License Information, Licensee acquires Red Hat Software Subscription entitlements for the listed Red Hat Products in the quantities and/or ratios set out below in this LI. The Red Hat Software Subscription entitlements are applicable and valid only to the extent the Red Hat Products are used in support of the Program, and only while Licensee has IBM Software Subscription and Support (S&S) in effect for the Program. Red Hat Software Subscription entitlements do not include support of the Red Hat Products to run, deploy or otherwise support any software other than the Program, and Licensee acknowledges additional per unit fees at Red Hat standard rates will apply for any broader usage.

Red Hat's standard Software Subscription support does not include Red Hat's remote access to Licensee's network and/or systems, but, if the parties mutually agree that remote access is needed for a support issue, such remote access is subject to the terms of the Remote Access Rider to the Red Hat agreement set forth at: <https://www.redhat.com/wapps/tnc/standalone/RemoteAccessRider> (Red Hat login required).

If Licensee's Program entitlement is designated "Reserved", the below entitlements to the Red Hat Products are not included and do not apply.

Red Hat Product:

Red Hat Enterprise Linux

- Additional Entitlement Ratio: 1 VPC/ 1 VPC

Red Hat OpenShift Container Platform

- Additional Entitlement Ratio: 3 VPC/ 1 VPC

"Additional Entitlement Ratio n/m" means that Licensee receives some number ('n') entitlements of the indicated metric for the identified program for every specified number ('m') entitlements of the specified metric for the Program as a whole. The specified ratio does not apply to any entitlements for the Program that are not of the required metric type. The number of entitlements for the identified program is rounded up to a multiple of 'n'.

"Conversion Entitlement Ratio n/m" means that Licensee can convert some number ('n') entitlements of the indicated metric for the listed program for every specified number ('m') entitlements of the specified metric for the Program. Once converted, Licensee may only use such converted entitlements for the listed program. The specified conversion does not apply to any entitlements for the Program that are not of the required metric type.

## 5. Use of Usage Metering Data

The Program enables use of a usage metering dashboard (the "Dashboard") that enables the display and monitoring of certain data and metrics regarding Licensee's deployment and usage of IBM and non-IBM software programs, as well as the computing environment on which they are deployed ("Usage Metering Data"). Usage of the Dashboard requires registration on either the Red Hat Marketplace or IBM Software Central. Licensee's usage of the Dashboard and IBM's use and sharing of Usage Metering Data are governed by the terms of the Service Description for the Red Hat Marketplace, Operated by IBM, available here: <https://www.ibm.com/support/customer/csol/terms?id=i126-8719>, and if Licensee enables or uses the Dashboard, Licensee agrees to those terms.
