IMPORTANT: READ CAREFULLY

Two license agreements are presented below.

1. IBM International License Agreement for Evaluation of Programs
2. IBM International Program License Agreement

If Licensee is obtaining the Program for purposes of productive use (other than evaluation, testing, trial "try or buy," or demonstration): By clicking on the "Accept" button below, Licensee accepts the IBM International Program License Agreement, without modification.

If Licensee is obtaining the Program for the purpose of evaluation, testing, trial "try or buy," or demonstration (collectively, an "Evaluation"): By clicking on the "Accept" button below, Licensee accepts both (i) the IBM International License Agreement for Evaluation of Programs (the "Evaluation License"), without modification; and (ii) the IBM International Program License Agreement (the "IPLA"), without modification.

The Evaluation License will apply during the term of Licensee's Evaluation.

The IPLA will automatically apply if Licensee elects to retain the Program after the Evaluation (or obtain additional copies of the Program for use after the Evaluation) by entering into a procurement agreement (e.g., the IBM International Passport Advantage or the IBM Passport Advantage Express agreements).

The Evaluation License and the IPLA are not in effect concurrently; neither modifies the other; and each is independent of the other.

The complete text of each of these two license agreements follow.

LICENSE INFORMATION

The Programs listed below are licensed under the following License Information terms and conditions in addition to the Program license terms previously agreed to by Client and IBM. If Client does not have previously agreed to license terms in effect for the Program, the International License Agreement for Evaluation of Programs (i125-5543-06) applies.

Program Name (Program Number):
IBM watsonx Assistant Cartridge 5.3 (Evaluation)

The following standard terms apply to Licensee's use of the Program.

Evaluation Period

The evaluation period begins on the date that Licensee agrees to the terms of this Agreement and ends after 60 days.

Supporting Programs

Licensee is authorized to install and use the Supporting Programs identified below only to support Licensee's use of the Principal Program under this Agreement. The phrase "to support Licensee's use" would only include those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. A Supporting Program may be accompanied by license terms, and those terms, if any, apply to Licensee's use of that Supporting Program. In the event of conflict, the terms in this License Information document supersede the Supporting Program's terms. Licensee must obtain sufficient entitlements to the Program, as a whole, to cover Licensee's installation and use of all of the Supporting Programs, unless separate entitlements are provided within this License Information document. For example, if this Program were licensed on a VPC (Virtual Processor Core) basis and Licensee were to install the Principal Program or a Supporting Program on a 10 VPC machine and another Supporting Program on a second 10 VPC machine, Licensee would be required to obtain 20 VPC entitlements to the Program.

Supporting Programs:

IBM Cloud Pak for Data Enterprise Edition

IBM Fusion

IBM Software Hub

Permitted Components

Licensee is permitted to use only the following components or functions of the identified Bundled or Supporting Program:

IBM Cloud Pak for Data Enterprise Edition

-Common core services

-Common database management UI

-Db2 Data Management Console

-IBM Cloud Pak Foundational Services

-- Business Teams Service

-- Certificate Management

-- Events Operator

-- Flink

-- Identity Management

-- Installer

-- Integrated UI

-- License Service

-- License Service Reporter

-- OpenSearch

-- Usage Metering Service

Prohibited Components

Licensee is not authorized to use any of the following components or functions of the Program:

IBM Software Hub Premium and IBM Software Hub AI Assistant features as specified in the documentation (of IBM Software Hub)

Modifiable Third Party Code

To the extent, if any, in the NOTICES file IBM identifies third party code as "Modifiable Third Party Code," IBM authorizes Licensee to 1) modify the Modifiable Third Party Code and 2) reverse engineer the Program modules that directly interface with the Modifiable Third Party Code provided that it is only for the purpose of debugging Licensee's modifications to such third party code. IBM's service and support obligations, if any, apply only to the unmodified Program.

Separately Licensed Code

Each of the components listed in the NON_IBM_LICENSE file is considered "Separately Licensed Code" licensed to Licensee under the terms of the applicable third party license agreement(s) set forth in the NON_IBM_LICENSE file(s) that accompanies the Program, and not this Agreement. Future Program updates or fixes may contain additional Separately Licensed Code. Such additional Separately Licensed Code and related licenses are listed in the applicable NON_IBM_LICENSE file that accompanies the Program update or fix.

Note: Notwithstanding any of the terms in the third party license agreement, the Agreement, or any other agreement Licensee may have with IBM, with respect to the Separately Licensed Code:

- (a) IBM provides it to Licensee WITHOUT WARRANTIES OF ANY KIND AND DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE, AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE;
- (b) IBM is not liable for any direct, indirect, incidental, special, exemplary, punitive or consequential damages including, but not limited to, lost data, lost savings, and lost profits.

Source Components and Sample Materials

The Program includes components in source code form ("Source Components"), or other materials identified as Sample Materials or both. Licensee may copy and modify Source Components and Sample Materials for internal use only within the limits of the license rights under this Agreement; provided, however, that Licensee may not alter or delete any copyright information or notices contained in the Source Components or Sample Materials. IBM provides the Source Components and Sample Materials without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

LICENSE INFORMATION

The Programs listed below are licensed under the following License Information terms and conditions in addition to the Program license terms previously agreed to by Client and IBM. If Client does not have previously agreed to license terms in effect for the Program, the International Program License Agreement (i125-3301-15) applies.

Program Name (Program Number):

IBM watsonx Assistant Cartridge 5.3 (5737-I55)

The following standard terms apply to Licensee's use of the Program.

Supporting Programs

Licensee is authorized to install and use the Supporting Programs identified below only to support Licensee's use of the Principal Program under this Agreement. The phrase "to support Licensee's use" would only include those uses that are necessary or otherwise directly related to a licensed use of the Principal Program or another Supporting Program. The Supporting Programs may not be used for any other purpose. A Supporting Program may be accompanied by license terms, and those terms, if any, apply to Licensee's use of that Supporting Program. In the event of conflict, the terms in this License Information document supersede the Supporting Program's terms. Licensee must obtain sufficient entitlements to the Program, as a whole, to cover Licensee's installation and use of all of the Supporting Programs, unless separate entitlements are provided within this License Information document. For example, if this Program were licensed on a VPC (Virtual Processor Core) basis and Licensee were to install the Principal Program or a Supporting Program on a 10 VPC machine and another Supporting Program on a second 10 VPC machine, Licensee would be required to obtain 20 VPC entitlements to the Program.

Supporting Programs:

IBM Cloud Pak for Data Enterprise Edition

IBM Fusion

IBM Software Hub

Permitted Components

Licensee is permitted to use only the following components or functions of the identified Bundled or Supporting Program:

IBM Cloud Pak for Data Enterprise Edition

-Common core services

-Common database management UI

-Db2 Data Management Console

-IBM Cloud Pak Foundational Services

-- Business Teams Service

-- Certificate Management

-- Events Operator

-- Flink

- Identity Management
- Installer
- Integrated UI
- License Service
- License Service Reporter
- OpenSearch
- Usage Metering Service

Prohibited Components

Licensee is not authorized to use any of the following components or functions of the Program:

IBM Software Hub Premium and IBM Software Hub AI Assistant features as specified in the documentation (of IBM Software Hub)

Non-Production Limitation

If the Program is designated as "Non-Production", Licensee can only use the Program as part of Licensee's internal development and test environment for internal non-production activities.

Components Not Used for Establishing Required Entitlements

Licensee may install and use the following Program components, under the license terms, but these components are not used to determine the number of entitlements required for the Program.

IBM Cloud Pak for Data Enterprise Edition

- Common core services
- Common database management UI
- Db2 Data Management Console
- IBM Software Hub
- IBM Cloud Pak Foundational Services
 - Business Teams Service
 - Certificate Management
 - Events Operator
 - Flink
 - Identity Management
 - Installer
 - Integrated UI
 - License Service
 - License Service Reporter
 - OpenSearch
 - Usage Metering Service
- IBM Software Hub

Modifiable Third Party Code

To the extent, if any, in the NOTICES file IBM identifies third party code as "Modifiable

"Third Party Code," IBM authorizes Licensee to 1) modify the Modifiable Third Party Code and 2) reverse engineer the Program modules that directly interface with the Modifiable Third Party Code provided that it is only for the purpose of debugging Licensee's modifications to such third party code. IBM's service and support obligations, if any, apply only to the unmodified Program.

Separately Licensed Code

Each of the components listed in the NON_IBM_LICENSE file is considered "Separately Licensed Code" licensed to Licensee under the terms of the applicable third party license agreement(s) set forth in the NON_IBM_LICENSE file(s) that accompanies the Program, and not this Agreement. Future Program updates or fixes may contain additional Separately Licensed Code. Such additional Separately Licensed Code and related licenses are listed in the applicable NON_IBM_LICENSE file that accompanies the Program update or fix.

Note: Notwithstanding any of the terms in the third party license agreement, the Agreement, or any other agreement Licensee may have with IBM, with respect to the Separately Licensed Code:

- (a) IBM provides it to Licensee WITHOUT WARRANTIES OF ANY KIND AND DISCLAIMS ANY AND ALL EXPRESS AND IMPLIED WARRANTIES AND CONDITIONS INCLUDING, BUT NOT LIMITED TO, THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE, AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE;
- (b) IBM is not liable for any direct, indirect, incidental, special, exemplary, punitive or consequential damages including, but not limited to, lost data, lost savings, and lost profits.

Source Components and Sample Materials

The Program includes components in source code form ("Source Components"), or other materials identified as Sample Materials or both. Licensee may copy and modify Source Components and Sample Materials for internal use only within the limits of the license rights under this Agreement; provided, however, that Licensee may not alter or delete any copyright information or notices contained in the Source Components or Sample Materials. IBM provides the Source Components and Sample Materials without obligation of support and "AS IS", WITH NO WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING THE WARRANTY OF TITLE, NON-INFRINGEMENT OR NON-INTERFERENCE AND THE IMPLIED WARRANTIES AND CONDITIONS OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The following units of measure may apply to Licensee's use of the Program.

Install

Install is a unit of measure by which the Program can be licensed. An Install is an installed copy of the Program on a physical or virtual disk made available to be executed on a computer. Licensee must obtain an entitlement for each Install of the Program.

Monthly Active User

Monthly Active User is a unit of measure by which the Program can be licensed. An Active User is a unique person who accesses the Program in any manner directly or indirectly (for example, through a multiplexing program, device or application server) through any means. Licensee must obtain sufficient entitlements to cover the maximum number of Active Users in any calendar month.

In addition to the above, the following terms apply to Licensee's use of the Program.

The following terms apply to Licensee's use of the Program

1. The Program, including but not limited to components, files, modules, audio-visual content or related licensed materials, as well as models, algorithms or data provided with the Program (collectively "Licensed Materials"), are IBM confidential information. Licensee agrees to hold the Licensed Materials in trust and confidence for IBM and shall preserve the confidentiality of the Licensed Materials. Licensee agrees that any threatened or actual violation of this confidentiality provision will cause irreparable injury to IBM, and IBM will be entitled to any legal or equitable remedies necessary to make it whole including any preservation measures or necessary injunctive relief that can be provided by an applicable authority capable of granting such measures or relief.

Licensee has implemented and will maintain throughout the term of this Agreement the network, platform, system, application, device, physical infrastructure, incident response, and personnel focused security policies, procedures, and controls that are necessary to protect the Licensed Materials against loss, alteration, unauthorized disclosure, unauthorized access, and unlawful forms of processing. Licensee will promptly (and in no event any later than 24 hours) notify IBM after becoming aware of any breach or other security incident that Licensee knows, or should reasonably suspect, affects or will affect the Licensed Materials or IBM, and will timely provide information that IBM requests about such security incident and the status of any Licensee remediation and restoration activities. Licensee will not permit the Licensed Materials to reside on servers located outside of the country in which IBM has made the Licensed Materials available to Licensee.

2. This Program includes the following software which may not be used for Evil purposes.

- json.jar

3. License to use the Pre-Trained Content

Content consists of all data, software, and information that Licensee or its authorized users provide, authorize access to, or inputs to the Program. For clarity, Licensee's Content does not include any publicly available content or Content provided by IBM ("IBM Content").

Pre-Trained Content is a library of terms and phrases for a specific domain used to train Watson models, and is IBM Content.

If the Licensee elects to use the Pre-Trained Content then the following term will also apply:

- IBM grants to Licensee a revocable (solely in the event of termination of this License Information Document and International Program License Agreement), non-exclusive, non-assignable, worldwide, paid-up license to use, execute, reproduce, perform and modify the terms and phrases provided with the Pre-Trained Content, for internal (to Licensee) use only, for the sole purpose of enhancing, extending or customizing the training of the Program. Any Licensee enhancements or extensions of Pre-Trained Content will be treated as Licensee Content. Pre-Trained Content may not be further distributed or used separately from the Program. IBM has no responsibility for the training data resulting from Licensee's use of and modification to the Pre-Trained Content and IBM warranties will not apply. IBM has no responsibility to maintain or provide support for the modified library of Pre-Trained Content containing Licensee's enhancements, extensions or customizations.

4. For each Install of the Program, Licensee's use is restricted to a maximum of 80 Virtual Processor Cores (VPCs).

Virtual Processor Core is a unit of measure by which the Program can be licensed. A Server is a physical computer that is comprised of processing units, memory, and input/output capabilities and that executes requested procedures, commands, or applications for one or more users or client devices. Where racks, blade enclosures, or other similar equipment is being employed, each separable physical device (for example, a blade or a rack-mounted device) that has the required components is considered itself a separate Server. A Virtual Server is either a virtual computer created by partitioning the resources available to a physical Server or an unpartitioned physical Server. A Processor Core is a functional unit within a computing device that interprets and executes instructions. A Processor Core consists of at least an instruction control unit and one or more arithmetic or logic unit. A Virtual Processor Core is a Processor Core on a Virtual Server created by partitioning the resources available to a physical Server or an unpartitioned physical Server.

5. Red Hat Products

Red Hat Products listed below include software, maintenance and support in the form of Red Hat Software Subscriptions governed by a separate Red Hat Enterprise Agreement set forth at <https://www.redhat.com/en/about/agreements> (or if applicable, a negotiated version of such agreement between Licensee and Red Hat). Under this License Information, Licensee acquires Red Hat Software Subscription entitlements for the listed Red Hat Products in the quantities and/or ratios set out below in this LI. The Red Hat Software Subscription entitlements are applicable and valid only to the extent the Red Hat Products are used in support of the Program, and only while Licensee has IBM Software Subscription and Support (S&S) in effect for the Program. Red Hat Software Subscription entitlements do not include support of the Red Hat Products to run, deploy or otherwise support any software other than the Program, and Licensee acknowledges additional per unit fees at Red Hat standard rates will apply for any broader usage. Red Hat's standard Software Subscription support does not include Red Hat's remote access to Licensee's network and/or systems, but, if the parties mutually agree that remote access is needed for a support issue, such remote access is subject to the terms of the Remote Access Rider to the Red Hat agreement set forth at: <https://www.redhat.com/wapps/tnc/standalone/RemoteAccessRider> (Red Hat login required). If Licensee's Program entitlement is designated "Reserved", the below entitlements to the Red Hat Products are not included and do not apply.

Red Hat Product:

Red Hat Enterprise Linux

- Additional Entitlement Ratio: 80 VPC / 1 Install

Red Hat OpenShift Container Platform

- Additional Entitlement Ratio: 80 VPC / 1 Install

"Additional Entitlement Ratio n/m" means that Licensee receives some number ('n') entitlements of the indicated metric for the identified program for every specified number ('m') entitlements of the specified metric for the Program as a whole. The specified ratio does not apply to any entitlements for the Program that are not of the required metric type. The number of entitlements for the identified program is rounded up to a multiple of 'n'.

6. IBM Fusion

- Additional Flat Entitlement: 12 Terabytes (TB) max usable capacity per OpenShift cluster

"Additional Flat Entitlement" means that regardless of the number of entitlements obtained to the Program, Licensee's use of the listed program is limited to the number of entitlement(s) listed.

Terabyte is a unit of measure by which the Program can be licensed. A Terabyte is 2 to the 40th power bytes. Licensee must obtain an entitlement for each Terabyte available to the Program. Instead of the entitlements required for the Program directly, Licensee must obtain Terabyte entitlements for this Program sufficient to cover the Terabytes managed by the Program

7. Use of Usage Metering Data

The Program enables use of a usage metering dashboard (the "Dashboard") that enables the display and monitoring of certain data and metrics regarding Licensee's deployment and usage of IBM and non-IBM software programs, as well as the computing environment on which they are deployed ("Usage Metering Data"). Usage of the Dashboard requires registration on either the Red Hat Marketplace or IBM Software Central. Licensee's usage of the Dashboard and IBM's use and sharing of Usage Metering Data are governed by the terms of the Service Description for the Red Hat Marketplace, Operated by IBM, available here: <https://www.ibm.com/support/customer/csol/terms?id=i126-8719>, and if Licensee enables or uses the Dashboard, Licensee agrees to those terms.

8. Each Monthly Active User is limited to 50 messages/spoken sentences per month. Licensee must acquire sufficient entitlements to cover actual numbers of messages/spoken sentences processed by the Program.

9 Use of IBM Fusion is limited to Fusion Data Foundation in internal deployment mode only, and when in internal deployment mode, also excludes disaster recovery, backup components, data cataloging, and advanced encryption with KMS

L/N: L-WPGB-QZXQKF

D/N: L-WPGB-QZXQKF

P/N: L-WPGB-QZXQKF
